"Art empowers students to express themselves, think creatively, and develop skills that enrich both their personal growth and academic success."

ART TEACHING METHOD

What will we explore in Art at Holy Trinity?

Personal Expression

Art provides a platform for self-expression, where you can communicate your thoughts, emotions, and experiences through visuals, often tapping into deeper feelings or ideas that words cannot express.

Art History and Culture

Learning about different artists, movements, and cultural influences can shape your work and inspire new ideas.

Techniques and Styles

From realistic to abstract, you can experiment with various techniques such as shading, blending, layering, and different painting styles like Impressionism, Cubism, or Surrealism. Learning different approaches helps you find your artistic voice.

Different Mediums and Materials

You can work with a wide range of materials like pencils, paints, clay, charcoal, oil pastels and even non traditional mediums.

Experimentation and Innovation

Art allows for risk-taking and pushing boundaries—whether it's trying new techniques, combining unusual materials, or using art in unconventional ways. It's a space for innovation and discovering fresh ways to create.

Collaboration and Feedback

Collaborating with others on group projects or receiving constructive feedback can offer new perspectives and inspire growth as an artist.

ART STUDIO EXPECTATIONS

Time Management

Focused work time: Studio time is precious, so students are expected to manage their time wisely.

Creative Process

Individual expression: The classroom should be a place where students feel free to explore their ideas. Respecting each person's unique artistic voice is vital.

Respect for Materials and Tools

Handling materials: Students are expected to handle all art materials and tools with care, ensuring they are used for their intended purposes and no wasted materials.

Overview of Art 10–20–30

The general art program for Grades 7 through 12

is a unified, sequential course that focuses on three major components of visual learning:

Drawings or delineations

– all the ways we record visual information and discoveries

Compositions or structures

– all the ways images are put together to create meaning

Encounters with art

– where we meet and how we respond to visual imagery.
